D8 ENDEAVOR

● Process and Quality Control by X-ray Powder Diffraction

The combination of best data, flexible sample handling and easy operation

- Dynamic Beam Optimization – no instrument reconfiguration by operator needed
- LYNXEYE XE-T detector – highest data quality and lowest quantification limits
- TouchControl – intuitive operation makes user training almost unnecessary
- 1 kW ECO – low running costs by energy savings and no need for cooling water
- Harsh environment – extra cooling and dust protection for highest reliability
